Northeastern Nuclear Science Center - CRCN

Recife, Pernambuco, Brazil

SCIENTIFIC INTRODUCTION SCHOLARSHIP

Jan. 2015 - Jul. 2016

One of the major challenges of managing radioactive sources in radioactive waste storage facilities is proper allocation of sources. Thus, the main objective of this work was to develop a software capable of receiving an arrangement of sources, and to optimize the organization of these sources so that the dose emitted by the set is minimized, thus reducing its impact on the environment.

Activities:

- Search Optimization.
- Web Development.

Technologies and Methodologies:

- Genetic Algorithm and Simulated Annealing.
- Python, Django, Celery, Javascript and HTML.

UFPE(Federal University of Pernambuco)

Recife, Pernambuco, Brazil
